## About Final Buttons

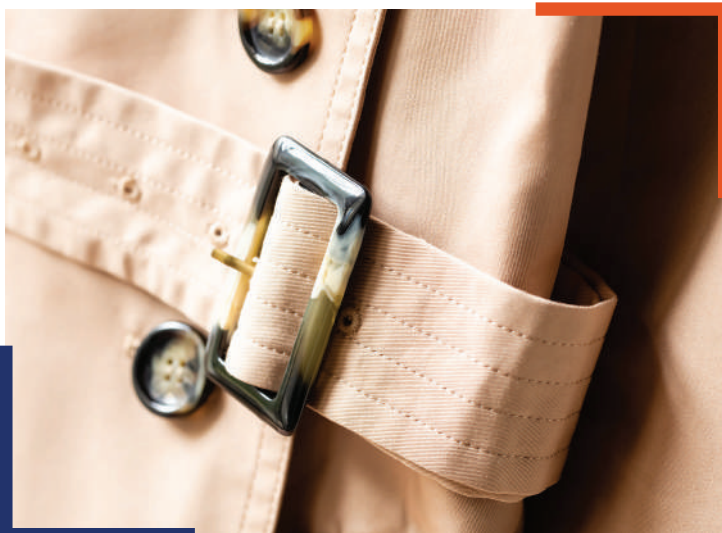

Since its establishment, Final Buttons has been a solution partner for many brands in the button industry in Turkey and around the world. Thanks to the knowledge and vision it has gained over the years, Final Buttons contributes to textile production in many regions of the world. Final Buttons use eco-friendly production methods with state-of-the-art equipment in its production facility developed over the years.

Final Buttons has a monthly production capacity of over 40 million in its two production facilities located in Istanbul. They manufacture many types of buttons, both synthetic and natural. With its growing team of 55 experts, Final Buttons provides quality and timely service to button needs in Turkey and different parts of the world.

## Why Final Buttons?

Final Buttons has nearly 20 years of experience and is among Europe's leading button manufacturers. In particular, with the production investments made in 2020, Final Buttons has advanced its quality and production capabilities. Final Buttons can deliver different models to production facilities anywhere in the world in a short time thanks to its stock system. Another unique feature of Final Buttons is its experience in export.

# POLYESTER BUTTON

The polyester button is a type of button that is frequently preferred and used in the clothing sector. The reason for its high demand is manufacturers which can produce a wide variety of polyester buttons, and customers can use polyester buttons in many areas and sectors functionally. Final Buttons has almost 20 years of experience in the polyester buttons field. It produces unlimited color options in all sizes between 12L and 72L in the polyester button group with its state-of-the-art machinery and equipment in its facilities, and it is a solution partner for global brands in the field of polyester buttons. It provides quality-oriented services to its customers with its expert team members on time.

# SUIT BUTTON

# OUTWEAR BUTTON

# SHIRT BUTTON

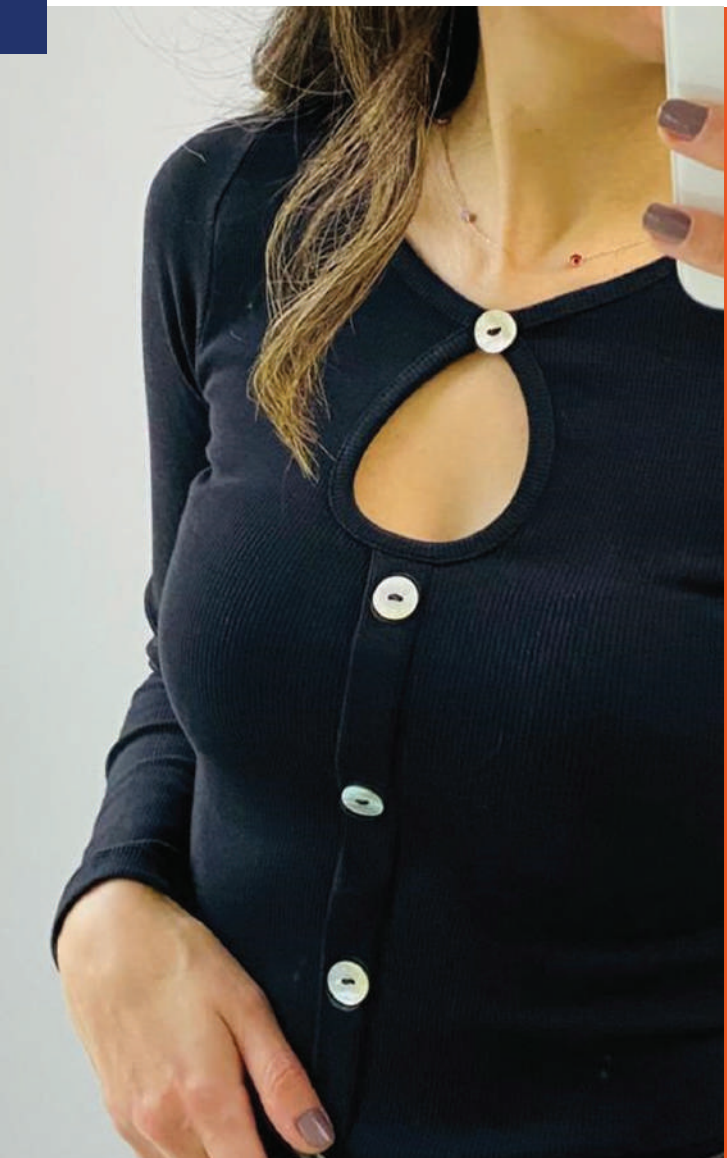

# REAL PEARL BUTTON

It is a type of button generally produced from seashells collected from the seas of South Asia. Pearl buttons, which have their original color and texture, are one of the environmentally friendly button types due to their natural source and sustainable production techniques. Final Buttons exports Pearl buttons to many different regions of the world. Especially through its systematic stock works, it provides great advantages to its stakeholders in terms of timing.

# ROD BUTTON

Although Rod Button is similar to polyester buttons in terms of their main raw material, it is a different button model regarding the production stages. This button model, which Final Buttons has been producing for many years, comes first in terms of design. Thanks to its production technique, the texture and appearance of the button are the same, adding value to the garment in which it is used. Final Buttons produces the design its customers envision by following their ideas through the techniques it has developed in Rod Buttons.

# KOROZO BUTTON

Korozo Button is a type of button whose raw material is the seed of a tree grown in the Amazon rainforest. This completely natural button type is very durable due to its fibrous structure. The details in its structure have an attractive aesthetic in the form of a button. Final Buttons have proven its quality in corozo buttons, another area in which it specializes, by working with many top brands. It offers different shapes and color options while preserving the natural structure of the button in the production process. Corozo buttons can be used comfortably in the children's group as they do not contain harmful substances.

**DESIGN**

**STOCK SERVICE**

# WOOD BUTTON

Another type of natural button produced by Final Buttons is wooden buttons. Made from carefully-selected certain types of wood, these buttons have been a mainstay in the ready-to-wear industry for many years. They are particularly preferred by children, due to their natural texture and lack of harmful content.

# MEETING POINT OF ART AND WOOD

# METALLIC BUTTON

Another product group served by Final Buttons is metal buttons. Thanks to the partnerships established by Final Buttons, it can offer quality service and competitive prices like its own produced buttons. It serves its customers with footed, perforated, logoed, and 300 different color options according to their requests.

# COVERED BUTTON

Fabric-covered buttons are the product group that Final Buttons stands out with the service it provides thanks to its know-how. Fabric-covered buttons, which are divided into two on the main basis, are perforated and footed. Button models covered with fabric in the desired style with special techniques have been preferred by brands for many years. Fabric covered buttons can be made with plastic and metal legs according to the customer's demand.
